

Invitation from the Foundation to a free online presentation

“Abnormal muscle co-contraction in the lower limbs: a factor limiting the mobility of patients with Autosomal Recessive Spastic Ataxia of Charlevoix-Saguenay (ARSACS)”

Thursday January 21, 2021, 1:30pm – 2:30 pm (EST)

Speakers: Dr. Luc Hébert and Olivier Audet, PHD

Online presentation for individuals affected with ARSACS, their caregivers and professionals

Presentation followed by a question period

“Our current research work therefore aims to study and better understand the nature and extent of these co-contractions in ARSACS during movements in the lower limbs. We hope that this new knowledge will allow the development of specific therapeutic interventions aimed at maintaining and improving the autonomy of people with ARSACS. The results of our most recent research and avenues for intervention will be presented at this conference”.
