

Be part of the change with RARE.Qc!

Do you live with a rare disease, or are you supporting someone who does? Do you want to make your voice heard and help advance research?

**RARE.Qc invites you to become a partner member of its research network or to join one of its committees.**

### **Why you?**

- To help us define research priorities in rare diseases.
- To help identify or initiate projects that benefit the rare disease community.
- To support the next generation of researchers, receive updates on the network's activities, and stay informed about advances in rare disease research.

### **How does it work?**

- A) You can simply become a partner member of RARE.Qc to stay informed and get involved at your own pace.
- B) If you would like to contribute more actively, you can also join a governance committee (Equity, Diversity and Inclusion (EDI) or Knowledge Mobilization).

RARE.Qc is the Quebec network that brings together more than 240 members — researchers, students, industry partners, patients, and caregivers — to advance rare disease research. Our vision is to use a network model to integrate research into every stage of care, and to transform the journey of people living with a rare disease.
